Studio TC6 re-opens

Studio Production Resources

Panoramic view of TC6 studio floor

Studio 6 at Television Centre (TC6) re-opened in September after a complete refurbishment. It offers a facility which is strongly competitive in the market-place — in terms of equipment, style and cost — and which underlines the BBC's commitment to its internal resource base.

John Lightfoot — Head of Studio Production Resources — told **Eng Inf**: "This major capital investment confirms BBC management's commitment to a strong internal resource base, within the Producer Choice system. We needed fewer studios than in

the past, but those we keep must still provide reliable facilities for our programme-makers. I am delighted that we are being supported with the right tools for success."

Tim Manning — General Manager of TE & PS — added: "We have been pleased to be in partnership with Studio Production Resources in this collaborative venture to provide BBC programme-makers with the latest technical facilities in the refurbished TC6."

Starting on page 3 is a description of the new facilities.
